DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

- a. Species I, as shown in figure 6.
- b. Species II, as shown in figure 12.
- c. Species III, as shown in figure 13.
- d. Species IV, as shown in figure 16.
- e. Species V, as shown in figure 22.
- f. Species VI, as shown in figure 24.
- g. Species VII, as shown in figure 27.
- h. Species VII, as shown in figure 31.
- i. Species IX, as shown in figure 33.
- j. Species X, as shown in figure 36.
- k. Species XI, as shown in figure 37.
- l. Species XII, as shown in figure 39.
- m. Species XIII, as shown in figure 44.
- n. Species XIV, as shown in figure 47.
- o. Species XV, as shown in figure 48.
- p. Species XVI, as shown in figure 49.
- q. Species XVII, as shown in figure 50.

After election of a Species, it is requested that the applicant further elect appropriately amongst the following subspecies for details of the particular variable delay circuit:

- i. Subspecies I, as shown in fig. 7, 8, and 9.
- ii. Subspecies II, as shown in fig. 18.
- iii. Subspecies III, as shown in fig. 19.
- iv. Subspecies IV, as shown in fig. 21.
- v. Subspecies V, as shown in fig. 41.
- vi. Subspecies VI, as shown in fig. 42.
- vii. Subspecies VII, as shown in fig. 45.
- viii. Subspecies VIII, as shown in fig. 46.

If applicant elects Species IV, it is also requested that the applicant elect amongst the following subspecies for details of the voltage level detector circuit:

- i. Subspecies I, as shown in fig. 17.
- ii. Subspecies II, as shown in fig. 20.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
